

Dear Wayne,

I wanted to let you know how impressed I was with the "Slip Stop" procedure you recently completed at our 2 restaurants. Slips and falls was been our greatest opportunity in the workman's comp. and customer accident category of insurance claims. I went to both restaurants after you completed the process and was amazed at the difference from before the treatment. Even with water on the floor it is clear that slips and falls will be reduced or eliminated.

I would be happy to talk with anyone considering this process that needs to speak with someone who actually had the process completed and believes that it is a great investment to make.
