Re: Recommendation SLIP STOP USA

For close to 30 years, Wayne Perkins and SLIP STOP USA have made our tile floors slip resistant and safe when wet. This gives both employees and customers improved foot traction and has reduced significantly slip and fall incidents.

I have received positive and glowing feedback from employees after treatments in my restaurants. It's so nice to hear how professional Wayne has been through the years and I highly recommend using his services to make your floors slip resistant and safe (even when wet!). I look forward to continuing my relationship with Wayne & Slip Stop USA.

For anyone with slip and fall issues or concerns with wet & slippery floors, I highly recommend contacting Wayne Perkins at 903-515-3191.

Truly,

John McMurray
